

Powerful learning and development experience for forward thinking Tech, Team, QC and Project Leaders who are looking for management and leadership training because they would like to **LEAD LIKE A PRO.**

Welcome to Lead-IT, the dynamic learning program that provides practical people management skills for leaders in technology industries. Become more personally effective in communication, 'on-the-level' performance management, and learn how to build collaborative teams to inspire motivation, innovation and excellent results.

This highly effective training program covers the key skills that technology leaders need to inspire highly skilled professionals and bring out the best in them.

Lead-IT is a well-researched, extensively tested program that is delivered in five key segment areas:

- Communicating with impact
- Building technology-led teams
- Increasing personal effectiveness
- Managing people for creativity and high productivity
- Leading knowledge-intensive teams for innovation

As a mark of quality, the program is endorsed by the ILM. Upon successful completion of the program participants will receive an internationally recognised qualification and certificate awarded by the City and Guilds of London, U.K.

## TRAINING PROGRAM SEGMENTS

## WHO SHOULD ATTEND?

Lead-IT is aimed at those working in the technology industry who need to lead and inspire others in a team setting for great results.

Our programs are typically attended by:

- Team leaders
- Tech leads
- QC leads
- Project leaders

## WHAT WILL THEY LEARN?

Participants will learn how to:

- Become a **better listener** and communicate more clearly for more **impactful conversations**
- Build **collaborative, high-performing teams** who work well together and **deliver results**
- Work **more effectively** with external stakeholders, such as Customers, Product owners and other teams
- Become more **pro-active** and **effective** when dealing with conflict and 'strong' personalities
- **Inspire** their **teams** to be more creative and innovative

## WHAT BENEFITS WILL PARTICIPANTS BRING BACK AT WORK?

Besides the personal enrichment that Lead-IT program participants will experience, they will bring a range of extra benefits back to their organisations. These will include:

- **Increased competence** in leadership and people skills
- Improved levels of **engagement** and **productivity** across their teams
- Renewed **commitment** to creativity and **innovation**
- A climate for entire teams to **thrive** and **develop**
- **Reduced staff turnover** due to increased enthusiasm and engagement

## WHO ARE THE FACILITATORS?

The segments are facilitated by international field experts with substantial, practical experience and with an understanding of the everyday real issues faced by team leaders in the knowledge intensive environment. They aim to bring out the very best in each participant on the program.
